BWT ROBOTIC
POOL CLEANERS
PROVIDE IMPECCABLE
CLEANING FOR
CLEAR WATER
AND IMMACULATE
SURFACES!

Unmatched suction power

BWT robotic cleaners feature the most powerful suction of any robot on the market. They can double their suction power through precise adjustment of the nozzles. The closer they are to the surface being vacuumed, the more powerful the suction. Suction can be adjusted to efficiently capture the type of debris to be picked up. Thus, close to a beach for example, the nozzles can be set down low to effortlessly remove every grain of sand.

Power inside!

Among the finest filtration performances on the market

BWT robotic pool cleaners are fitted with a **4D filter**, an exclusive four dimensional filter that cleans four times better than any other.

The filter fabric features loops that capture the smallest micro-particles. This means that BWT can guarantee one of the finest filtration performances on the market.

Finesse inside !

Safe and reliable

The safety of users is of utmost importance. This is why BWT robotic pool cleaners run off a low voltage transformer and are fitted with an **automatic stop**, as required by European standards.

The devices are also equipped with in water and out of water safety mechanisms.

EXCELLENCE, INTELLIGENCE, INNOVATION

The BWT world is made for you, and its robotic pool cleaners are designed with you in mind.

Don't hesitate, step into an exceptional world.
