

# FERAFLOC

## Metal ion sequestering agent

MAINTENANCE

### 1. PROPERTIES

**FERAFLOC** is a chemical substance that neutralises metallic ions in the pool water.

**FERAFLOC** may be used as a **preventive treatment** upon filling the pool or when fresh water is added to the pool, or as a **curative treatment**, to treat metal sulphide stains.

These blackish stains are the result of the reaction of metal ions (Iron, Copper or Manganese) with Hydrogen Sulphide generated by Sulphate reducing bacteria that may occur between the waterproofing membrane and the wall of the pool.

### 2. INSTRUCTIONS FOR USE

- Shake the flask well to homogenise the solution.
- Pour 400 mL **FERAFLOC** for every 10 m<sup>3</sup> of water into the skimmer.
- In the event of a curative treatment, repeat the procedure every week after carrying out a filter back wash, until the stains have disappeared.

### 3. TECHNICAL DATA

Appearance	Clear, yellow liquid
pH	7 +/- 1
Density	1.045 +/- 0.02
Storage	Store protected from light, heat and cold
Product identifier	N-Alkyl(C12-C16)-N,N-Dimethyl-N- Benzylammonium Chloride
Contains among other components (EC regulation No. 648/2004 - 907/2006)	Less than 5 %: phosphonate, cationic surfactants

### 4. PRECAUTIONS FOR USE

**DANGER:** Causes severe eye damage. Very toxic to aquatic organisms .

**CAUTION:** Read the label before use. Keep out of the reach of children. If medical advice is sought, have the recipient or label available. Avoid release into the environment. Wear protective gloves, protective clothing and eye/ face protection.

### 5. PACKAGING

8885101	Ferafloc - 1 litres
8885103	Ferafloc - 3 litres
