A woman with dark hair is lying on her back on a bright pink inflatable ring in a swimming pool. She is wearing a white bikini top. Her legs are raised and bent at the knees. She is looking up towards the sky. The water is clear blue with ripples. A semi-transparent blue rectangle is overlaid on the left side of the image, containing white text.

SUPERLINER V2F 0.85mm

Simple, durable and efficient, over the last forty years Superliner V2F 0.85 mm membranes have been used to waterproof tens of thousands of pools

Only BWT non-slip step pieces comply with the requirements for class C certification according to the European standard EN 15288-1, concerning pool safety.

Clean and beautiful

You like warm water? So does Superliner V2F. An anti-fungal agent impregnated into the membrane protects it against the growth of algae, bacteria and other micro-organisms. It may get warm, really warm, but your Superliner V2F will stay clean, unblemished and beautiful.

Outstanding performance

Superb dimensional stability
Superliner V2F's excellent mechanical properties are the result of the high quality components and skilled techniques that go into its manufacture in BWT's factory in Le Rheu, France.

Happiness at 35°C

A Superliner V2F 0.85 mm membranes can withstand water temperatures up to 35°C.

Both sides of Superliner V2F liners are coated with a protective acrylic varnish.

The layer of varnish on the wall side of the membrane is 5 microns thick, it ensures excellent resistance to micro-organisms that can grow under the liner.

Happiness at 35°C

The liner beading solution

This technology is protected by a BWT patent, it has the following advantages:

- Proven reliability, tried and tested over many years,
- No visible welds around the upper periphery of the liner for a flawless finish,
- No noticeable colour difference between the membrane and the liner beading,
- Uniform ageing of the membrane,

- Completely resistant to attack by micro-organisms and the effects of UV light,
- Perfectly homogeneous colours,
- Pattern continuity is respected.

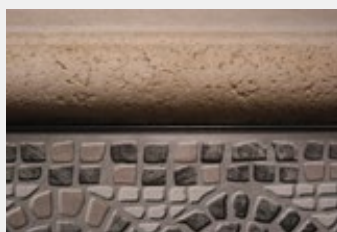

Choose a Hung Cristal beading for your Superliner V2F. It is assembled with no visible welds, this ensures a flawless pool finish and facilitates cleaning of the water line.

Hung Cristal liner beading:
an exclusive BWT patent.

- No visible welds,
- No colour difference.

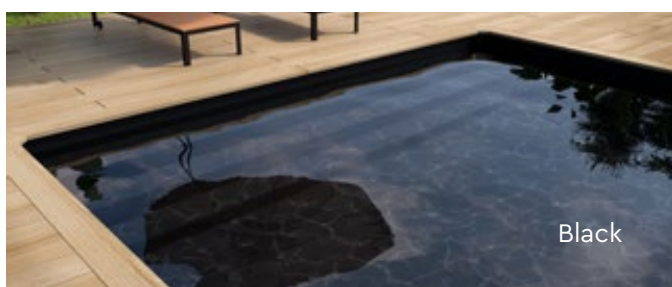

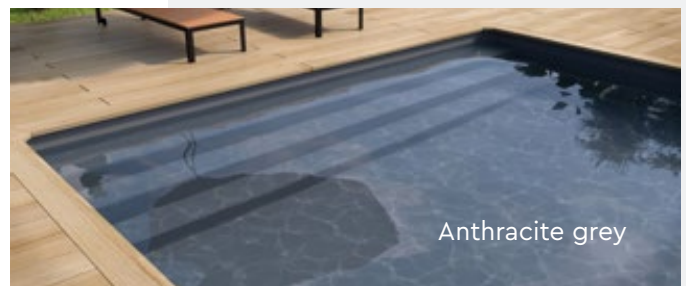

- Homogeneous pattern or colour,
- Pattern continuity respected.

The 8 micron thick layer of varnish on the surface in contact with the water fulfils four functions:

- It facilitates cleaning of the liner, notably along the water line,
- It helps protect pigments against the action of UV light,
- It slows the discolouration of the membrane,
- It protects the membrane against abrasion and scratching.
