

The background image shows a poolside area with a white metal railing, several lounge chairs with cushions, and a view of a blue ocean and mountains in the distance. A semi-transparent blue box is overlaid on the left side of the image, containing the main text.

# Initiale V1F membrane Lasting protection for your pool!

REINFORCED WATERPROOFING MEMBANES

# BWT INITIALE REINFORCED MEMBRANE 1 VARNISHED SURFACE

*A new generation membrane,  
now even more beautiful!*

Initiale V1F, the result 35 years of experience, allows you to create your unique, dream pool. Your pool, just as you imagined it.

## BWT REINFORCED MEMBRANES, RESILIENT

Initiale reinforced membranes are hard-wearing: when young and old let loose, you remain Zen, even faced with the most boisterous play.

# WHAT IS A REINFORCED MEMBRANE?

## PERFECTLY LEAKTIGHT

It is a waterproofing skin comprised of two PVC membranes bound to a reinforcing mesh that renders the membrane dimensionally stable and almost impossible to tear. BWT adds a protective varnish to its membranes, this prevents the migration of micro-organisms into the PVC.

**Summer and winter, BWT offers the best possible protection.**

## A FLAWLESS, SMOOTH SURFACE

Initiale reinforced membranes are equipped with an ultra-flat reinforcing mesh; the surface of the membrane is extremely smooth, there is no embossing where dirt could catch. The floor and walls are easy to maintain, and the water line remains spotlessly clean.

## IMPECCABLE BEAUTY

The varnish imparts a smooth, beautiful finish. It facilitates cleaning of the membrane, especially along the water line and slows discolouration. It also protects the membrane against abrasion and scratching.

## THE SEAL OF APPROVAL FROM PROFESSIONALS ALL AROUND THE WORLD

**Experts assert: BWT Initiale reinforced membranes, are the last word in reinforced membranes.**

And it's true. This is the reason why BWT Initiale reinforced membranes are the preferred choice for beautiful pools in major international hotels, and high-end wellness facilities. Fitting specialists particularly appreciate the extraordinary suppleness of the membrane, very pleasant to work with even in extreme weather conditions.

Initiale V1F  
reinforced membrane

Initiale V1F offers

# PEACE OF MIND FOR YEARS TO COME

The guarantees covering Initiale V1F reinforced membranes are the result of high quality manufacturing and excellent reliability.

Initiale V2F membranes comply with the AFNOR NF T 54 804 and NF 15836-2 standards, as well as the REACH (EC 1907/2006) directive.

*Initiale V1F membranes are protected by a layer of varnish on the surface in contact with the pool water.*

Your waterproofing membrane is well protected against algae and bacteria, and against the stains that they can cause.

Dark blue		
Light grey		
Anthracite grey		

## THE CLASSIC?

The sun lounger blown into the pool by the wind. A liner would be ripped, but your reinforced membrane withstands this type of incident.

*Geometric or free-flowing shapes,*

# ALWAYS UNIQUE

Rectangular pools, curves, free-form, sloped or flat floors, with decks and steps, etc. Initiale reinforced membranes hug every shape, even your most creative whim.

## THE PROFESSIONALS' CHOICE

Beautiful, hard-wearing and easy to maintain, Initiale reinforced membranes are the reference across the five continents when it comes to beautiful hotel pools.

## NEW BUILDS OR RENOVATION

Initiale reinforced membranes can be laid over any type of support, they are suitable for new builds and for the renovation of old pools.

Carefully fitted by professionals according to regulations in effect; a perfect fit, optimal waterproofing and comfort of use for years to come.
