

The background image shows a woman and a young child playing in a swimming pool. The woman is smiling and holding the child, who is leaning over her. They are in the water, which is splashing. In the background, there are several lounge chairs on a pool deck and a large, snow-capped mountain range under a clear blue sky.

Winterafe winter safety cover

FOR EXISTING POOLS & POOLS UNDER CONSTRUCTION

WINTERSAFE, THE WINTER SAFETY COVER

The WINTERSAFE cover provides exceptional protection to your pool throughout the winter.

No more problems with leaves and debris, discolouration of your membrane, the growth of algae or other nuisances.

Your pool can be reopened in one step.

Its sophisticated design blends beauty with toughness while complying with the safety standard NF P 90-308.

It integrates easily into your pool surrounds, and optimises safety around your pool.

WINTERSAFE is an opaque, PVC coated reinforced woven 650g polyester cover. The surface in contact with the ground is beige to prevent discolouration of the coping. Cleverly spaced perforations allow rain water to drain rapidly, thus avoiding the formation of water pockets.

Covers with step pieces and free form covers feature additional perforations to ensure efficient drainage. The diameter of the perforations is calculated to limit the passage of light in order to prevent problems associated with photosynthesis.

WINTERSAFE's PVC coating is UV stabilised and is not deteriorated by chlorinated products. Its glossy, varnished surface is beautiful, stain resistant and very easy to clean.

The WINTERSAFE cover is fastened in place with fixkits attached to its peripheral snap rod. This system holds the fabric of cover evenly against the coping to limit the wind load, flapping and abrasion.

WINTERSAFE covers comply with the French safety standard NF P 90-308.

WINTERSAFE covers are delivered with a storage bag.

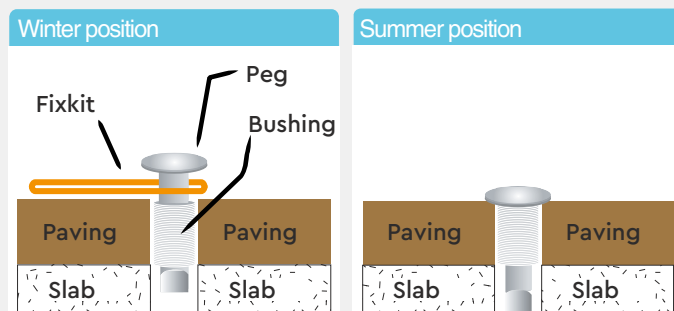

- Protects the parts of pool above the water line
- Inhibits photosynthesis
- Catches dirt and debris
- Secures the pool
- Excellent tensile stress loading
- Great dimensional stability

AVAILABLE COLOURS:

The surface of the cover in contact with the ground is always beige to prevent staining of the coping.

Peripheral snap rod + Fixkit

Secures pools

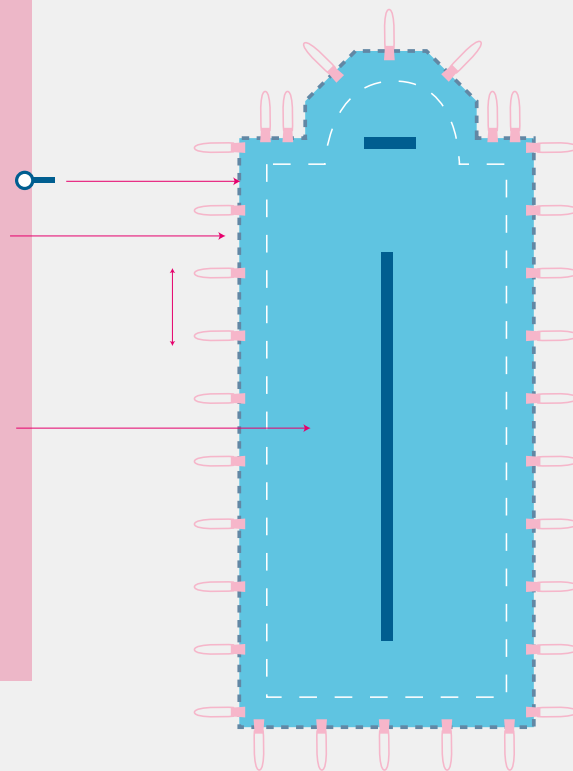

Peripheral strip enclosed in the hem of the cover.

Overlap of 35 cm beyond the water.

Fasteners at 1 m intervals (+/- 10%)

Fabric: 650 g/m² blue/beige, green/beige or grey/beige ;
Failure load:
Warp: 180 daN/5cm (+/-5%) ;
Weft: 250 daN/5cm (+/-5%).

Micro-perforated central panel grey/beige, blue/beige or green/beige.

LEGAL NOTICE

Wintersafe covers comply with the French standard NF P 90-308 (May 2004 version concerning pool protection) in as far as all the components of the cover are provided by Procopi. A safety cover for pools intended to deny children under five access to the pool. This cover is no substitute for common sense or individual responsibility. Nor is it intended to replace the vigilance of parents and or responsible adults which remains key to ensuring the protection of young children.
